An open letter to future customers of Sky Shades -

Over a year ago we had the pleasure of having a beautiful shade structure designed, created and installed for us by Sky Shades. It was an instant hit with the many families in our school and church as well as the teachers, administrators and children. Everyone associated with the company was a delight to work with, very professional, courteous and expert.

The most remarkable quality of the structure is its beauty. The students in the school were so impressed that they were inspired to sketch it and even photograph it for our art festival that year. It resembles the sails of a ship and their imagination is stirred by its design. When I do tours of the school for prospective parents it is one of the first things they remark on.

More importantly however, is its practical function. Before its installation our school children and teachers suffered in our year-round Floridian heat and the dangerous UVA rays it brings. The Sky Shades structure has completely stopped the misery, constant complaints and, more importantly, the sunburned skin. What a relief! Occasionally we experience cold weather in Florida also, but this has not presented a problem with our shade structure. It was expertly designed so that while the uncomfortable and dangerous hot summer sun would be blocked, the necessary winter sun would be able to warm the playground when needed - how ingenious!

Obviously we are thrilled with the work that this company performed for us. They continue to provide excellent maintenance and service and we could not recommend them more highly.

Sincerely,

Amanda March
Director, All Saints School
